CONTENTS OF VOLUME 48

NUMBER 1, SEPTEMBER, 1964

1 DIAMOND, JARED M. Transport of salt and water in rabbit and guinea pig gall bladder

15 DIAMOND, JARED M. The mechanism of isotonic water transport

43 VAN STEVENINCK, J., and BOOIJ, H. L. The role of polyphosphates in the transport mechanism of glucose in yeast cells

61 ARMSTRONG, W. McD., and ROTHSTEIN, A. Discrimination between alkali metal cations by yeast. I. Effect of pH on uptake

73 NORTHROP, JOHN H. The effect of proteolytic enzymes on *E. coli* phages and on native proteins

79 SAVITZ, DAVID, SIDEL, VICTOR W., and SOLOMON, A. K. Osmotic properties of human red cells

95 SELIGER, H. H., BUCK, J. B., FASTIE, W. G., and MCELROY, W. D. The spectral distribution of firefly light

105 COFFEY, R. G., CHELDELIN, VERNON H., and NEWBURGH, R. W. Glucose utilization by chick embryo heart homogenates

113 ULBRICHT, WERNER. Some effects of calcium ions on the action potential of single nodes of Ranvier

129 DEL CASTILLO, J., DE MELLO, W. C., and MORALES, T. Influence of some ions on the membrane potential of *Ascaris* muscle

141 HAGIWARA, SUSUMU, and NAKA, KEN-ICHI. The initiation of spike potential in barnacle muscle fibers under low intracellular Ca^{++}

163 HAGIWARA, SUSUMU, CHICHIBU, SHIKO, and NAKA, KEN-ICHI. The effects of various ions on resting and spike potentials of barnacle muscle fibers

NUMBER 2, NOVEMBER, 1964

183 CARSTEN, MARY E., and MOMMAERTS, W. F. H. M. The accumulation of calcium ions by sarcotubular vesicles

199 VAN DER KLOOT, WILLIAM G., and DANE, BENJAMIN. The efflux of substances from frog ventricles to sucrose and to Ringer's solutions

225 EDWARDS, CHARLES, CHICHIBU, SHIKO, and HAGIWARA, SUSUMU. Relation between membrane potential changes and tension in barnacle muscle fibers

235 FREYGANG, W. H., JR., GOLDSTEIN, D. A., HELLAM, D. C., and PEACHEY, L. D. The relation between the late after-potential and the size of the transverse tubular system of frog muscle

265 ARMSTRONG, CLAY M., and BINSTOCK, LEONARD. The effects of several alcohols on the properties of the squid giant axon

279 MOORE, JOHN W., ULBRICHT, WERNER, and TAKATA, MITSURU. Effect of ethanol on the sodium and potassium conductances of the squid axon membrane

297 ADOLPH, ALAN R. Spontaneous slow potential fluctuations in the *Limulus* photoreceptor

323 HIGASHINO, SHOJI, and TAKAGI, SADAYUKI, F. The effect of electrotonus on the olfactory epithelium

337 WITTENBERG, JONATHAN B., SCHWEND, MARY J., and WITTENBERG, BEATRICE A. The secretion of oxygen into the swim-bladder of fish. III. The role of carbon dioxide

357 FEINSTEIN, MAURICE B. Reaction of local anesthetics with phospholipids. A possible chemical basis for anesthesia

375 SCHULTZ, STANLEY G., ZALUSKY, RALPH, and GASS, ARTHUR E., JR. Ion transport in isolated rabbit ileum. III. Chloride fluxes

379 ROSEN, HERMAN, LEAF, ALEXANDER, and SCHWARTZ, WILLIAM B. Diffusion of weak acids across the toad bladder. Influence of pH on non-ionic permeability coefficients

NUMBER 3, JANUARY, 1965

393 DENNISON, DAVID S. Steady-state phototropism in *Phycomyces*

409 CASTLE, EDWARD S. Differential growth and phototropic bending in *Phycomyces*

425 USSING, HANS H., BIBER, THOMAS U. L., and BRICKER, NEAL S. Exposure of the isolated frog skin to high potassium concentrations at the internal surface. II. Changes in epithelial cell volume, resistance, and response to antidiuretic hormone

435 TAKEDA, KIMIHISA, and KENNEDY, DONALD. The mechanism of discharge pattern formation in crayfish interneurons

455 WINEGRAD, SAUL. Autoradiographic studies of intracellular calcium in frog skeletal muscle

481 VON BÉKÉSY, GEORG. The effect of adaptation on the taste threshold observed with a semiautomatic gustometer

489 HOROWICZ, PAUL, and GERBER, CARL J. Effects of external potassium and strophanthidin on sodium fluxes in frog striated muscle

515 HOROWICZ, PAUL, and GERBER, CARL J. Effects of sodium azide on sodium fluxes in frog striated muscle

527 LEB, DANIEL E., HOSHIKO, T., and LINDLEY, BARRY D. Effects of alkali metal cations on the potential across toad and bullfrog urinary bladder

NUMBER 4, MARCH, 1965

543 CEREIJIDO, MARCELINO, and CURRAN, PETER F. Intracellular electrical potentials in frog skin

559 TAKAGI, SADAYUKI F., and YAJIMA, TOSHI. Electrical activity and histological change in the degenerating olfactory epithelium

571 KLAHR, SAULO, and BRICKER, NEAL S. Energetics of anaerobic sodium transport by the fresh water turtle bladder
581 FUKAMI, Y., FURUKAWA, T., and ASADA, Y. Excitability changes of the Mauthner cell during collateral inhibition
601 JACKSON, P. C., and STIEF, K. J. Equilibrium and ion exchange characteristics of potassium and sodium accumulation by barley roots
617 VAN STEVENINCK, J., WEED, R. I., and ROTHSTEIN, A. Localization of erythrocyte membrane sulfhydryl groups essential for glucose transport
633 CLAYTON, RODERICK K. Characteristics of fluorescence and delayed light emission from green photosynthetic bacteria and algae
647 GATZY, JOHN T., and CLARKSON, T. W. The effect of mucosal and serosal solution cations on bioelectric properties of the isolated toad bladder
673 WOLBARSHT, MYRON L., and HANSON, FRANK E. Electrical activity in the chemoreceptors of the blowfly. III. Dendritic action potentials
685 KAPLAN-BRESLER, ANN E. Metmyoglobin oxidation during electron transport reactions in mitochondria
699 WHITTEMBURY, GUILLERMO. Sodium extrusion and potassium uptake in guinea pig kidney cortex slices
719 COOK, JOHN S. The quantitative interrelationships between ion fluxes, cell swelling, and radiation dose in ultraviolet hemolysis

NUMBER 5, PART 1, MAY, 1965

737 SCHUEL. H., LORAND, L., SCHUEL, R., and ANDERSON, N. G. Isolation of relaxing particles from rat skeletal muscles in zonal centrifuges
753 BLATZ, PAUL E. The role of carbonium ions in color reception
761 MULLINS, L. J., and AWAD, M. Z. The control of the membrane potential of muscle fibers by the sodium pump
777 SJODIN, R. A. The potassium flux ratio in skeletal muscle as a test for independent ion movement
797 BARR, L., DEWEY, M. M., and BERGER, W. Propagation of action potentials and the structure of the nexus in cardiac muscle
825 CIOFALO, FRANK R., and THOMAS, LYELL J., JR. The effects of zinc on contractility, membrane potentials, and cation content of rat atria
841 MILLIGAN, J. V. The time course of the loss and recovery of contracture ability in frog striated muscle following exposure to Ca-free solutions
859 ARMSTRONG, CLAY M., and BINSTOCK, LEONARD. Anomalous rectification in the squid giant axon injected with tetraethylammonium chloride
873 KAPLAN, J. GORDIN. An inducible system for the hydrolysis and transport of β-glucosides in yeast. I. Characteristics of the β-glucosidase activity of intact and of lysed cells
887 MACLEOD, DON P., and DANIEL, E. E. Influence of glucose on the transmembrane action potential of anoxic papillary muscle
901 GRANDA, ALLEN M., and STIRLING, CHARLES E. Differential spectral sensitivity in the optic tectum and eye of the turtle

919 ABBOTT, BERNARD C., and PARNAS, I. Electrical and mechanical responses in deep abdominal extensor muscles of crayfish and lobster
933 GOERKE, JON, and PAGE, ERNEST. Cat heart muscle *in vitro*. VI. Potassium exchange in papillary muscles
949 PAGE, ERNEST. Cat heart muscle *in vitro*. VII. The temperature dependence of steady state K exchange in presence and absence of NaCl
957 PAGE, ERNEST, and STORM, S. R. Cat heart muscle *in vitro*. VIII. Active transport of sodium in papillary muscles

NUMBER 5, PART 2, MAY, 1965

COLE, KENNETH S. Introduction
1 ADELMAN, W. J., JR., DYRO, F. M., and SENFT, J. Long duration responses obtained from internally perfused axons
11 MOORE, J. W. Voltage clamp studies on internally perfused axons
19 NARAHASHI, T. Potential, structure, and excitability of giant axon membrane
27 HODGKIN, A. L., and CHANDLER, W. K. Effects of changes in ionic strength on inactivation and threshold in perfused nerve fibers of *Loligo*
31 MEVES, H., and CHANDLER, W. K. Ionic selectivity in perfused giant axons
35 VILLEGAS, RAIMUNDO, BLEI, MARGARITA, and VILLEGAS, GLORIA M. Penetration of non-electrolyte molecules in resting and stimulated squid nerve fibers
41 BRINLEY, F. J., JR. Discussion report
49 SPYROPOULOS, C. S. The role of temperature, potassium, and divalent ions in the current-voltage characteristics of nerve membranes
55 HAGIWARA, SUSUMU. Relation of membrane properties of the giant muscle fiber of a barnacle to internal ionic composition
59 HANAI, T., HAYDON, D. A., and TAYLOR, JANET. Some further experiments on bimolecular lipid membranes
65 EISENMAN, GEORGE, and CONTI, FRANCO. Some implications for biology of recent theoretical and experimental studies of ion permeation in model membranes
75 GOLDMAN, D. E. Gate control of ion flux in axons
79 FRANKENHAEUSER, BERNHARD. The ionic currents in the myelinated nerve fiber
83 SJODIN, R. A. Discussion report

NUMBER 6, JULY, 1965

975 MILLIGAN, J. V., and EDWARDS, CHARLES. Some factors affecting the time course of the recovery of contracture ability following a potassium contracture in frog striated muscle
985 NAKAMURA, YUTAKA, NAKAJIMA, SHIGEHIRO, and GRUNDFEST, HARRY. The action of tetrodotoxin on electrogenic components of squid giant axons
997 WINEGRAD, SAUL. The location of muscle calcium with respect to the myofibrils

1003 HELLAM, D. C., GOLDSTEIN, D. A., PEACHEY, L. D., and FREYGANG, W. H., JR. The suppression of the late after-potential in rubidium-containing frog muscle fibers

1011 CURRAN, PETER F., and CEREIJIDO, MARCELINO. K fluxes in frog skin

1035 ULBRICHT, WERNER, and FLACKE, W. After-potentials and large depolarizations of single nodes of Ranvier treated with veratridine

1047 KEDEM, ORA, and ESSIG, ALVIN. Isotope flows and flux ratios in biological membranes

1071 MCLAREN, IAN A. Temperature and frog eggs. A reconsideration of metabolic control

1081 BEHRENS, M. E., and WULFF, V. J. Light-initiated responses of retinula and eccentric cells in the *Limulus* lateral eye

1095 TASAKI, ICHIJI, SINGER, IRWIN, and TAKENAKA, TOSHIFUMI. Effects of internal and external ionic environment on excitability of squid giant axon. A macromolecular approach

1125 TOSTESON, D. C., COOK, P., and BLOUNT, R. Separation of adenosine triphosphatase of HK and LK sheep red cell membranes by density gradient centrifugation

1145 LETTERS TO THE EDITOR

HERRIOTT, ROGER M. Inhibition of pepsin by a dipeptide—A correction

MCBURNEY, DONALD H. Subthreshold adaptation of taste

1147 INDEX TO VOLUME 48
